IBM Tivoli NetView for z/OS offers an extensive set of tools for managing and maintaining complex, multivendor, multiplatform networks and systems from a single point of control. The NetView for z/OS curriculum consists of four courses. You can tailor their training by taking one or more of the following courses:

- **NetView for z/OS 6.1 Fundamentals (TZ203)**, where you learn the key concepts, components, and user interfaces associated with NetView for z/OS 6.1
- **NetView for z/OS 6.1 Automation (TZ213)**, which covers the automation facilities of IBM Tivoli NetView for z/OS
- **NetView for z/OS 6.1 REXX (TZ223)**, where you learn how to write REXX EXECs using NetView for z/OS
- **NetView for z/OS 6.1 PIPEs (TZ233)**, where you learn how to code NetView PIPEs within REXX EXECs to simplify operations and perform automation by using NetView for z/OS

This course combines the content from all four of these courses, thus providing comprehensive training for Tivoli NetView for z/OS version 6.1. It covers basic concepts, components, user interfaces, automation facilities, REXX, and PIPEs. Instructor-led discussions are reinforced with practical, hands-on lab exercises.

**Skills Gained**

- Describe the NetView key components and tasks
- Describe key functions
- Navigate these user interfaces: 3270 and TEP
- Use NetView commands
- Explain these user interfaces: NMC and web application
- Customize by using CNMSTYLE, style sheets, and reporting
- Explain basic IP management functions and System z networking
- Identify the data that is integrated from OMEGAMON XE products
- Identify event types that can be processed and the way that they arrive in NetView for z/OS
- Identify what actions are possible and where they can be routed
Who Can Benefit

This intermediate-level course is for Administrators who are new to NetView for z/OS Administrators who are moving to version 6.1 from a previous version.

Prerequisites

You must be familiar with:

- networking concepts and practices and the techniques for monitoring a complex environment.

Familiarity with previous versions of NetView is helpful, but not required.

Course Details

NetView for z/OS Fundamentals

- NetView for z/OS overview
- NetView packaging and installation
- NetView structure and components
- The 3270 interface
- Customizing NetView using CNMSTYLE
- NetView administration
- IP management
- NetView Web Services Gateway
- NetView Management Console (NMC) interface
- NetView Enterprise Management Agent
NetView automation

- Message Automation topics
- NetView commands to facilitate automation
- Managing the NetView Automation Table
- NetView Automation Table coding

REXX

- Introduction to REXX
- Miscellaneous topics
- Variables
- Process Message in REXX
- Problem analysis
- Additional topics

PIPEs

- Overview of NetView pipelines
- PIPE stages
- Access files With PIPEs
- Pipelines and variables
- Manipulate text in a pipeline
- Process pipeline data
- Advanced topics
