Architecting on AWS covers the fundamentals of building IT infrastructure on AWS. The course is designed to teach solutions architects how to optimize the use of the AWS Cloud by understanding AWS services and how these services fit into cloud-based solutions. This course emphasizes AWS cloud best practices and recommended design patterns to help students think through the process of architecting optimal IT solutions on AWS. Case studies throughout the course showcase how some AWS customers have designed their infrastructures and the strategies and services they implemented.

Skills Gained
This course teaches you how to:

- Make architectural decisions based on the AWS-recommended architectural principles and best practices.
- Leverage AWS services to make your infrastructure scalable, reliable, and highly available.
- Leverage AWS managed services to enable greater flexibility and resiliency in an infrastructure.
- Make an AWS-based infrastructure more efficient in order to increase performance and reduce costs.
- Use the Well-Architected Framework to improve architectures with AWS solutions.

Who Can Benefit
This course is intended for:

- Solutions Architects
- Solution Design Engineers

Prerequisites
We recommend that attendees of this course have the following prerequisites:

- Courses taken: AWS Technical Essentials
- Working knowledge of distributed systems
- Familiarity with general networking concepts
- Working knowledge of multi-tier architectures
- Familiarity with cloud computing concepts

Course Details

AWS Certified Solution Architect - Associate Certification
If you are interested in achieving the associate AWS Architect certification, the Architecting on AWS class is the best way to help prepare. Find out more about all AWS certifications at https://www.exitcertified.com/certification/aws/

Delivery Method
This course is delivered through a mix of:

- Instructor-led Training
- Hands-on Labs

Day 1
- The Simplest Architectures
- Adding a Compute Layer
- Adding a Database Layer
- Networking in AWS Part 1

Day 2
- Networking in AWS Part 2
- AWS Identity and Access Management (IAM)
- Elasticity, High Availability, and Monitoring
- Automation

Day 3
- Caching
- Building Decoupled Architectures
- Microservices and Serverless Architectures
- RTO/RPO and Backup Recovery Setup
- Optimizations and Review
