IBM - Introducing z/OS UNIX System Services

This course describes how open standards are implemented in a z/OS system by z/OS UNIX. UNIX System Services are introduced, and the role of z/OS as a server in the open systems environment is discussed. This is an introductory level course. It provides an overview of z/OS UNIX System Services (usually abbreviated to z/OS UNIX) as seen by the user. Details of installation and implementation for system programmers are not covered in this course.

Skills Gained

- Discuss the role of z/OS in an open systems environment
- Identify the basic terms used in z/OS UNIX
- Define the components of z/OS UNIX
- Explain major functions provided in z/OS UNIX
- Discuss opportunities for applications in a z/OS UNIX environment
- Identify z/OS base elements and optional features that make up z/OS UNIX
- Use the two interactive interfaces available to access the services

Who Can Benefit

This intermediate course is for all computer professionals who will use z/OS UNIX.

Prerequisites

You should have a basic knowledge of z/OS equivalent to the course An Introduction to the z/OS Environment (ES05G).

Course Details

Day 1

- Welcome and introduction
- Unit 1: z/OS UNIX overview
- Unit 2. Introduction to z/OS UNIX
- Unit 3. Hierarchical file system
- Exercises

Day 2

- Unit 4. z/OS UNIX shell and utilities
- Unit 5. z/OS UNIX shell commands
- Unit 6. Working with the shell
- Unit 7. Functions in z/OS UNIX
- Exercises

Day 3

- Unit 8. Working with the z/OS UNIX environment
- Exercises

Schedule (as of 5)
