Overview

Do you need a reliable, robust, cost effective and fast deployment platform for your web solution? Or do you want to build a mobile app but dont want to waste time and resources building features such as user access control, database persistence and push notification?

This Massive Open Online Course provides module based learning covering Bluemix, an open-standards, cloud-based platform for building, managing, and running apps of all types, such as web, mobile, big data, and smart devices. The course includes an overview workshop that introduces basic concepts for creating, deploying, and managing applications on Bluemix, and additional modules that provide more detail about Bluemix run-times and plug-ins. Over time, the course will expand to include more run-time and plug-in specific modules.
