

IBM Excellence Award

IBM Training 2019

IBM - IBM Directory Server 6.4 Fundamentals

Code: TW085G
Length: 2 days
URL: [View Online](#)

This course describes the processes, procedures, and practices necessary to configure and administer IBM Directory Server. During the hand-on exercises, students will perform basic Directory Server configuration, setup replication, use logs and problem determination tools to troubleshoot directory server.

Students will not only learn about the components, functions, and features that are part of the directory server, but will learn about typical deployment scenarios of the directory server, as well.

Skills Gained

- Define LDAP and discuss concepts regarding LDAP standards
- Manage directory entries and search the directory; explain the purpose of the directory schema
- Define the security features of IBM Directory Server
- Define the replication features of IBM Directory Server
- Define the performance features of IBM Directory Server
- Define problem determination facilities

Who Can Benefit

LDAP Administrators

Prerequisites

Before taking this course, make sure that you have the following skills:

- Working knowledge of Linux
- Working knowledge of general security concepts, including SSL, authentication, and authorization

Course Details

Course Outline

- Unit 1: IBM Directory Server overview
 - Unit 2: Managing directory data
 - Unit 3: Directory Server features
 - Unit 4: Distributed Directories
 - Unit 5: Performance
 - Unit 6: Problem determination
