

Cloud Operations on AWS (formerly Systems Operations)

Code:	AWS-SYS-OPS-PTNR
Length:	3 days
URL:	View Online

System Operations on AWS is designed to teach those in a Systems Administrator or Developer Operations (DevOps) role how to create automatable and repeatable deployments of networks and systems on the AWS platform. The course covers the specific AWS features and tools related to configuration and deployment, as well as common techniques used throughout the industry for configuring and deploying systems.

Skills Gained

This course is designed to teach you how to:

- Use standard AWS infrastructure features such as Amazon Virtual Private Cloud (VPC), Amazon Elastic Compute Cloud (EC2), Elastic Load Balancing, and Auto Scaling from the command line
- Use AWS CloudFormation and other automation technologies to produce stacks of AWS resources that can be deployed in an automated, repeatable fashion
- Build functioning virtual private networks with Amazon VPC from the ground up using the AWS Management Console
- Deploy Amazon EC2 instances using command line calls and troubleshoot the most common problems with instances
- Monitor the health of Amazon EC2 instances and other AWS services
- Manage user identity, AWS permissions, and security in the cloud
- Manage resource consumption in an AWS account using tools such as Amazon CloudWatch, tagging, and Trusted Advisor
- Select and implement the best strategy for creating reusable Amazon EC2 instances
- Configure a set of Amazon EC2 instances that launch behind a load balancer, with the system scaling up and down in response to demand

- Edit and troubleshoot a basic AWS CloudFormation stack definition

Who Can Benefit

This course is intended for:

- System Administrators
- Software Developers, especially those in a Developer Operations (DevOps) role

Prerequisites

We recommend that attendees of this course have the following prerequisites:

- Attended the AWS Technical Essentials course
- Background in either software development or systems administration
- Some experience with maintaining operating systems at the command line (shell scripting in Linux environments, cmd or PowerShell in Windows)
- Basic knowledge of networking protocols (TCP/IP, HTTP)

Course Details

AWS Certified SysOps Administrator - Associate Certification

If you are interested in achieving the associate AWS SysOps Admin certification, the Systems Operations on AWS class is the best way to help prepare. Find out more about all AWS certifications at
<https://www.exitcertified.com/certification/aws/>

Delivery Method

This course will be delivered through a mix of:

- Instructor-Led Training (ILT)
- Hands-on Labs

Course Outline

Day 1

- System Operations on AWS Overview
- Networking in the Cloud
- Computing in the Cloud

Day 2

- Storage and Archiving in the Cloud
- Monitoring in the Cloud

- Managing Resource Consumption in the Cloud

Day 3

- Configuration Management in the Cloud
- Creating Scalable Deployments in the Cloud
- Creating Automated and Repeatable Deployments

Note: course outline may vary slightly based on the regional location and/or language in which the class is delivered.
