

Oracle - Oracle CPQ Cloud Administration

Code:	CPQ-CLD-ADMIN
Length:	5 days
URL:	View Online

Oracle CPQ Cloud Administration is a bundle course consisting of four individual CPQ Cloud courses, Oracle CPQ Cloud Site Administration, Oracle CPQ Cloud Configuration, Oracle CPQ Cloud Commerce, and Oracle CPQ Cloud Document Designer.

In the Site Administration portion of the class the learner will learn how to perform general site administration tasks in the areas of File Manager, User Management, Bulk Data Uploads and Downloads, Data Tables, and Migration Center.

In the Configuration portion of class the learner will learn how to create product hierarchies, create configurable attributes and arrays, create configuration flows and use the configuration layout editor, and create and implement configuration rules.

In the Commerce portion of class the learner will learn how to work with Commerce attributes, work in the Commerce layout editor, create Commerce actions and build formulas, Create approval sequences, setup Commerce rules, and work with steps, participant profiles, and transition rules.

In the Document Designer portion of class the learner will learn how to create Document Designer templates, use the Document Designer editor, add layout items to a template, add element items to a template, use conditions and loops in the building of documents, work with heading styles, use XSL Snippets, implement translations, and integrate eSignature.
