

# Oracle - Oracle Financial Services Analytical Applications

**Code:** FINA-LS

**URL:** [View Online](#)

This learning subscription is an all digital solution for anyone on your team seeking training on Oracle Financial Services Analytical Applications (OFSAA). You get 24/7 access to a comprehensive set of high definition training videos delivered by Oracle experts throughout the subscription period. The training in this learning subscription is periodically updated with new content and information, including features and product enhancements for new releases. Hands-on labs are included so you can practice what you learn. This learning subscription covers both the technical and functional aspects of OFSAA. Develop a solid foundation about OFSAA solutions, including an in-depth look at the OFSAA functional architecture, key modules, the relationship between those modules, features, functionality, and business process capabilities. Learn how to implement, configure, administer, navigate and use the OFSAA product suite. Technical training covers the OFSAA Infrastructure and Data Integration Hub. Functional training includes Basel, Liquidity Risk Management, Loan Loss Forecasting and Provisioning, Financial Crime and Compliance Management, and Fund Transfer Pricing and Profitability Management.

## Skills Gained

- Deepen your understanding of the OFSAA Infrastructure, an infrastructure component required for all OFSAA applications
- Use OFSAA components
- Update and upload a data model
- Run the rule and forms framework
- Perform data migration using Data Integration Hub
- Utilize OFSAAI to configure business, technical, operational and access control requirements
- Utilize OFSAA Framework components including the Modeling and Stress Testing Framework for business requirements
- Perform GL reconciliation using the Reconciliation Framework
- Transform business requirements into OFSAA logical components using the Run Rule Framework
- Assign user roles and access permissions
- Execute Batch Operations, Scheduling and Interface
- Create technical and business metadata elements like hierarchy, measure, data set and more.
- Understand the Basel I, II and III guidelines, as well as Basel I and II compliance
- Understand the main features and key benefits of the Basel application
- Configure the Capital Buffers rules
- Create reports and dashboards using the OFSAA Basel Analytics Application
- Compute RWA for an exposure using the OFSAA Basel Application
- Understand the functional coverage, architecture and business assumptions of LRM
- Leverage data management, data model, configuration management, time bucketing, the holiday calendar/business day convention, cash flow aggregation, currency conversion and batch management
- Perform the steps and processes involved in an OFSAA LRM implementation
- Explain the types of Counterbalancing Strategy and when to use it
- Understand the importance of OFSAA LLFP as part of IFRS9 (International Financial Reporting Standards)

- Explain functionalities of LLFP and describe its architecture
- Define concepts of IFRS9
- Use various tools and techniques within OFSAA
- Configure the LLFP application to compute Expected Loss Amount and EIR
- Become familiar with Oracle FCCM
- Understand the importance of Compliance Management for the bank
- Explain the functionalities of FCCM and its architecture
- Become familiar with project implementation activities of FCCM at a bank or financial institution
- Leverage the functionalities of the anti-money laundering component of FCCM
- Explain behavior detection modules, including trade compliance
- Develop a deeper understanding of the Anti-Money Laundering component of FCCM
- Explore other behavior detection modules such as Trade Compliance
- Gain insight into the concepts and processes supporting a bank's profitability model
- Become familiar with funds transfer pricing and cost allocation concepts within this solution
- Configure OFSAA Funds Transfer Pricing and Profitability Management
- Understand implementation topics experienced while deploying OFSAA
- Work with the OFSAA modules
- Run allocation rules and review the results

## **Who Can Benefit**

- Functional Implementers
- End Users
- Business Analysts
- Project Managers
- Sales Consultants
- Technical Consultants
