

Oracle - Oracle Utilities Learning Subscription

Code: UTL-LS
URL: [View Online](#)

Learn about your Oracle Utilities solutions, including an in-depth look at the architecture, core components, functionality, business processes and implementation considerations for your applications. The training is all digital, accessible for 12 months, and updated for new features and product enhancements. This learning subscription covers: Customer Care and Billing, Customer Self Service, Meter Data Management, Mobile Workforce Management, Network Management System, Operational Device Management, Oracle Utilities Analytics, Oracle Utilities Application Framework, Smart Grid Gateway, Service Order Management, and Work and Asset Management.

Skills Gained

- Get started using your Oracle Utilities solution
- Configure the applications to address specific business requirements
- Change and maintain the front-end and back-end configurations of your applications
- Implement solutions on mobile devices
- Use the Oracle Utilities Application Framework to extend Oracle Utilities products
- Transform your business by using Smart Grid Gateway as a single point of connection between smart grid applications and devices
- Effectively operate the Network Management System applications to view the status of the distribution network and take corrective or proactive actions
- Create and generate reports using the Oracle Utilities BI product
